

May 22, 2018

Dear Parents of upcoming 7th graders,

This year your child will be required to complete Summer IXL in math. As most of you know during the summer months many students tend to forget skills and concepts taught the previous year. This is especially true in math. In hopes of keeping that regression to a minimum, your child will be required to complete the following IXL units over the summer. It is my hope that by doing so less time will be spent on review at the beginning of the year, and more time spent introducing and mastering new skills necessary for a successful transition to 7th grade.

The IXL units will be due the first day of school, will be checked, and your child will receive a grade on it. It would be most beneficial if they did not complete it as soon as school is out as this will defeat its purpose.

Please complete the following units at the 7th grade level. These are review units, so your child should not have any trouble with them.

E.1 Adding and subtracting decimals

E.3 Multiplying decimals

E.5 Dividing decimals

E.11 Evaluating Numerical expression involving decimals

A.1 Identifying Prime or Composite Numbers

A.2 Prime Factorization

If your child wants to practice any other skills they need to work on 6th grade skills that were not assigned during the year.

I hope you all have a great summer, and I look forward to having your child again in math next year as we take on Pre-Algebra!

Sincerely,

Mrs. Dickens
